Vision System for autonomous vehicles

Greetings Instructors,

The Cityscapes Dataset can be downloaded from the following website:

https://www.cityscapes-dataset.com/

The image data used for our image segmentation project are as follows,

gtFine - Fine Annotations Dataset

gtFine_trainvaltest.zip (241MB) [md5]
fine annotations for train and val sets (3475 annotated images) and dummy annotations (ignore regions) for the test set (1525 images)

left 8-bit images – Original images to be segmented.

leftImg8bit_trainvaltest.zip (11GB) [md5]
left 8-bit images – train, val, and test sets (5000 images)

In the code blocks we have specified the places that we need to read the above said images.

Thanks,

Chhavi Sharma,

Prahasan Gadugu,

Supriya Ayalur Balasubramanian
